144	<p><b>Creating the yellow and red lock and switch objects:</b></p> <ol style="list-style-type: none"> <li>1. Create sprites called <code>spr_lock_yellow</code> and <code>spr_switch_yellow</code> using <code>Lock_yellow.gif</code> and <code>Switch_yellow.gif</code>. Enable the <b>Smooth edges</b> option for them both.</li> <li>2. Create a new object called <code>obj_lock_yellow</code> and give it the yellow lock sprite. Enable the <b>Solid</b> option. Set <b>Parent</b> to the wall object.</li> <li>3. Add an <b>Alarm, Alarm 0</b> event and include the <b>Check Empty</b> action. Set <b>X</b> to <code>xstart</code>, <b>Y</b> to <code>ystart</code>, and <b>Objects</b> to <b>all</b>. Using the variables <code>xstart</code> and <code>ystart</code> will check that there are no collisions at the start position of the lock.</li> <li>4. Switch to the <b>move</b> tab and include the <b>Jump to Start</b> action.</li> <li>5. Include the <b>Else</b> action followed by a <b>Set Alarm</b> action. Set <b>Number of Steps</b> to <b>2</b> so that the lock tries again quite quickly.</li> <li>6. Create a new object called <code>obj_switch_yellow</code> and give it the yellow switch sprite. Set <b>Depth</b> to <b>10</b> to make sure that it appears behind other objects.</li> </ol>
